ABOVE User Survey

4. ABOVE User Requirements

This review is particularly interested in how well ABOVE data will meet the requirements of data users.

9. How valuable are the following environmental variables to your analysis? Please check “NA” if you are unsure how the environmental variable relates to you decision making or analysis.

	Vital	Somewhat Valuable	Marginal	Not Valuable	NA
Vegetation abundance, distribution, and phenology	<input type="radio"/>				
Landscape change (permafrost thaw, karst, lake formation/drainage)	<input type="radio"/>				
Fire extent, timing, and severity	<input type="radio"/>				
Soil carbon content/fluxes	<input type="radio"/>				
Faunal abundance, distribution	<input type="radio"/>				

ABOVE Stakeholder Suggestions

1. Please provide a list of stakeholder(s) (name, organization and email) you feel should be a part of the ABOVE Community (user, advisory, applications, etc) .
