

Postdoctoral Research Associate Position Available- University of Alaska Fairbanks

A postdoctoral research associate position is available at the University of Alaska Fairbanks. We offer the exciting opportunity to serve as a liaison between scientists and collaborators and stakeholders, leading to the co-production of data and tools for knowledge transfer and new insights into research blind spots. The position is funded for one year through the USGS Alaska Climate Science Adaptation Center (AK CASC).

The ideal candidate would have experience in working with state and federal agencies and tribal consortiums. They would also possess knowledge of the co-production process and familiarity with the unique attributes of arctic and boreal systems. The selected individual will coordinate with the Integrated Ecosystem Model of Alaska project as well as other AK CASC activities and related efforts to connect management needs to tools. The desire and ability to serve as lead author and contributing author on peer-reviewed manuscripts is necessary as is the ability to engage in public speaking. Required qualifications include a Ph.D. at the time of appointment in fields related to science communication, natural resource management, or applied science. Review of applications will begin in early November and continue until the position is filled.

Please direct any question about the position to Dr. Eugénie Euskirchen, seuskirchen@alaska.edu. To read more details about the position and apply please go to:
