# Charge to Round-Robin Topical Breakouts

1) **Science lessons learned during ABoVE:** What are the top-level highlights of our science? What are the most impactful advances?

2) **Infrastructure lessons learned during ABoVE:** What have we learned about running coordinated field campaigns, data management, logistics across institutions, and keeping investigators safe? What is the relevance to current scoping studies and future campaigns?

3) **Knowledge gaps:** What are the key remaining knowledge gaps? What did we miss, not do well, or were unable to address?

4) **Engaging and collaborating with communities, land managers, and decision-makers**: How can we make our science more inclusive and impactful? How can we connect earlier with potential users? How can we engage together as a Science Team, not just in individual projects? How can we begin an equitable spin-down of existing collaborations?

5) **Research legacy in the ABoVE Domain:** What are the continuing projects post-ABoVE, priorities for follow-on research, links back to knowledge gaps?
